Congratulations! Please accept this note as confirmation that you have been accepted into Berkeley Coding Boot Camp. You will be joining a highly selective cohort of colleagues as you embark on this intensive journey. Through immersive classroom instruction, you and your peers will dive into a dynamic curriculum that covers the fundamental skills for web development.

We will follow up soon with a detailed class schedule as part of your orientation package. This orientation packet and pre-work will also cover specifics that you will need to get including hardware, software, and tools. You are expected to have a Mac less than 2 years old or a Windows with 8 gs ram and dual processor. You will also need a second monitor, a webcam & microphone (built into laptop or external), headphones, and high speed internet connection in a quiet place for online class. Those with Chromebooks or tablets (including iPads) will need to get a laptop before class begins.

Please note that the Berkeley Coding Boot Camp learning experience extends far beyond the classroom. By accepting admission into the program, you are agreeing to participate as an active learner in a highly interactive program that includes lectures, skills labs, and rigorous project work. While the class time is there to teach and guide you, the time you spend studying outside of class is just as important to your success.

Once again, congratulations! We are excited to have you on board and look forward to seeing what you accomplish throughout the program. If you have any questions about course content or logistics, please contact us at (510) 306-1218.

Sincerely,

Sean Butcher
Program Director
